

# Full Syllabus

## Course Title

Advanced Topics in Machine Learning for Computational Biology

## Lecturer

Dr. Jérôme Tubiana

## Semester

ב

## Course requirements

Introduction to Machine Learning (0368-3235)  
OR Introduction to Statistical Learning (0365.3130)  
OR another equivalent course.  
No prior knowledge of biology is required.

## Final grade components

Homeworks (Theoretical and Biological Data Analysis, 40%), Article Presentation (50%), Article Report (10%).

## Course schedule

Class no. / Date	Subject and Requirements (assignments, reading materials, tasks, etc.)
Class 1	Linear models and extensions (GLM, GAM, LASSO) for Tabular Data.
Class 2	Decision trees and extensions (Decision rules; boosted trees) for Tabular Data.
Classes 3,4	Interpretable Machine Learning with Model agnostic-explanations. <ul style="list-style-type: none"> <li>a) Partial Dependency and Accumulated Local Effects plots.</li> <li>b) Permutation Feature Importance.</li> <li>c) LIME and SHapley Additive exPlanations (SHAP).</li> </ul>
Classes 5,6	Deep Learning Architectures for Unstructured Data <ul style="list-style-type: none"> <li>a) Convolutional Neural Networks.</li> <li>b) Graph Neural Networks.</li> <li>c) Transformers.</li> <li>d) Saliency maps.</li> </ul>
Classes 7,8	Data visualizations with low-dimensional embeddings (PCA, tSNE, UMAP).
Class 9	Meaningful feature extraction with Matrix Factorization Algorithms (K-means; Non-negative Matrix Factorization; Sparse PCA; Sparse Dictionary Learning).
Classes 10,11,12	Deep Generative Models <ul style="list-style-type: none"> <li>a) Taxonomy of Generative models (Autoregressive, Latent variable, etc.)</li> <li>b) Variational Inference &amp; Variational Autoencoders.</li> <li>c) Denoising Diffusion Generative Models</li> </ul>
Class 13	Developing and Troubleshooting Deep Learning models

## Required course reading

/

TEL AVIV אוניברסיטת תל אביב  
UNIVERSITY תל אביב

# Full Syllabus

## Optional course reading

- a) An Introduction to Statistical Learning by James, Witten, Hastie, Tibshirani & Taylor.  
<https://www.statlearning.com>
- b) Interpretable Machine Learning by Molnar. <https://christophm.github.io/interpretable-ml-book/>
- c) Understanding Deep Learning by Prince.  
<https://udlbook.github.io/udlbook/>

## Comments

The course will be given in English
